Physica D 45 (1990) 482–483
North-Holland

ANALYTIC SUBJECT INDEX

adaptive stochastic cellular automata 159, 181
α curves 36
aperiodicity 3
arrow of time 420
attractors 441

Belousov–Zhabotinsky 293
binary difference fields 49
Boolean derivatives 63

CA lab 463
CAM-6 271, 463
cellular automata software 463
cellular automaton rules 189
change propagation nets 49
chaos 307, 420
chemical turbulence 293
circular cellular automata 386
classification 26, 105, 136, 357, 386, 420
complexity 63, 420
computation theory 404, 420, 431
conservation laws 49
constant-time computation 404
context-sensitivity 396
coupled map lattices 122, 452
critical behavior 77, 95, 122, 328
cyclic cellular automata 19

diffusion-controlled reactions 285
digital mechanics 254
dominance 441

elementary cellular automata 3, 26, 396

fields 271
finite automata 396
finite-state automata 404
finite-time computation 404
fluctuations 19
formal language theory 396
fractals 36, 49, 431

Game of Life 105
geometrical quantities 271
global behavior 357
GSM mappings 396

halting problem 386, 431
HIV 208

immunology 208
information conservation 229
injectivity 357
interacting particle systems 19
invariant measures 136
invariants 49, 278, 328
invertible cellular automata 229
irreversible cellular automata 345
Ising 345

Kawasaki spin exchange 285
knots 328

λ parameter 77, 95, 136
languages 404
lattice gas automata 63
LCAU 463
learning 159, 181
linear cellular automata 36
linearity 3
Lyapunov exponents 452

Mathematica 463
mean field theory 95, 105, 122, 136
multifractals 36
mutual information 77, 307

nets 441
neural nets 159, 181, 431
neuroscience 205
NH_4Br 189
non-uniform cellular automata 159, 181
nonlinearity 3

Physica D 45 (1990) 482–483
North-Holland
